i) Segregation of Waste

Segregation of waste is a crucial step in effective waste management, helping to manage both degradable and nondegradable waste from the academic, hostel and canteen by providing separate dustbins for both of them. Garden waste like collected leaves, grass clippings and other plant materials used for making compost. Proper waste segregation helps in the efficient handling, recycling, and disposal of different types of waste, minimizing environmental impact.

ii) E-waste management

Electronic Devices like old computers, phones, and other electronic gadgets collected from all departments on regular basis and disposes it through authorized e-waste Management Company, Sri Laxmi Computers for recycling.

iii) Waste Water Recycling

Waste water recycling, also known as water reuse or water reclamation, is the process of treating wastewater for various purposes instead of disposing of it. A sewage treatment plant having a capacity of 50000 liters per day is installed on the premises. The treated water is stored in an underground water storage tank distributed for gardening. The wastewater generated in washrooms and canteen sent to STP for further treatment.

iv) Hazardous Waste

All non-working, scrap batteries collected in the college campus are sold to the dealer. The college does not produce any hazardous waste.
