## CIRCULAR

This is to inform that Trinity College of engineering and technology, peddapalli is organizing "A One Week Faculty Development Program on Power Electronics, Energy Storage and Renewable Technologies (PEESRT) for E-Transportation in India" from 20-09-2021 to 25-09-2021. All the faculty members of concerned department are requested to register and attend the program.

## ABOUT THE COLLEGE

Trinity College Of Engineering And Technology was established in the year 2008, by Trinity Educational Society for community development in a backward educational area dominated by under privileged sections of the society. The college has completed 16 years of its existence with glory. The college is located in Peddapalli with good connectivity of road and rail. The great strength of the college is visionary management. Availability of strategic planning, documentation, record keeping, E-management and innovative teaching practices; quality and access are the core values in curriculum and teaching and evaluation methodologies in alignment with global trends.

## ABOUT THE DEPARTMENT

The department of EEE established in 2008 with the approval of AICTE, is set in an open, student friendly atmosphere. We have a fine blend of dynamic and experienced faculty who provide quality education in technical UG programs with JNTU-H curriculum, the department places equal emphasis on theoretical and practical domains of electrical and electronics engineering. The laboratories are highly modernized to reflect the rapidly changing trends in technology. We have been organizing many symposiums, workshops, skill development programs to encourage the students to refine their personality and extracurricular skills.

## ABOUT THE FDP

This FDP is designed to address research advancements in Power conversion topologies and applications in the industry and to encourage various zonal professionals'/students/academicians towards research and for their Academic Quality Improvement too. This course will offer a unique opportunity to all the participants in the relevant topics in Real Time Power Electronic systems and its applications through theoretical sessions and simulation plus laboratory-based experiments and demonstrations. Applications of power electronics can be found in several areas like industry, transportation, medical, telecommunication, residential, energy systems, etc.

## THE OBJECTIVE OF FDP

This FDP intended to address the uncertainties and challenges in EV and associated technologies through knowledge and information exchange. This in due course will lead to acquiring deep knowledge in the development and implementation of low-cost and eco- friendly electric mobility and charging systems. The academia is yet to change its curricula to cope up with these rapid changes in the technology.

## TOPICS COVERED

- Master techniques of design-oriented analysis for switched-mode power converters.
- Verify the design of closed-loop regulated power converters using switching
- Modern Electric Drives and Control Techniques for EVs.

### FDP OBJECTIVES:

This FDP intended to address the uncertainties and challenges in EV and associated technologies through knowledge and information exchange. This in due course will lead to acquiring deep knowledge in the development and implementation of low-cost and eco- friendly electric mobility and charging systems. The academia is yet to change its curricula to cope up with these rapid changes in the technology. The gap between the academia and industry might be reduced by arranging some workshops/ FDP programs to faculty by industry experts in relevant areas. The main aim of this FDP is to expose the faculty to new developments in the above areas of technology and the same may be imparted in the student community.

## TOPICS COVERED:

Master techniques of design-oriented analysis for switched-mode power converters• Verify the design of closed-loop regulated power converters using switching and averaged circuit simulations• Modern Electric Drives and Control Techniques for EVs• Design input filters for switched-mode power converters• Advanced power converters for various applications and• Provide hands on exposure to real time digital control techniques.• Hands on simulation practice of inverters, high gain converters, PV fed converters, resonant converters and its applications in E-Transportations

## OUT COMES OF FDP

Create an awareness of the need and importance of Sustainable technology.• Impart knowledge and develop skills in diverse training methods in imparting training to students and research scholar.• Plan curriculum that can imbibe the skills and competencies to achieve goals, have a positive attitude and can cope with the changing times.• Develop with a technical and professional mindset.• Develop Techniques of proposal preparation and write feasible and viable project.

## ABOUT THE FDP

The aim of this program is to provide a platform for faculties/researchers of technical institutions to understand the recent research developments and to explore future trends in various areas of Electrical, Electronics, Computer Science Engineering and its applications.

## THE OBJECTIVE OF FDP

Provide a platform for teachers to discuss the present trends in laboratory classes in EEE. Discussion on better teaching methods in laboratory classes with respect to Outcome Based Education (OBE). To discuss and arrive at the methods regarding motivation of students to utilize the laboratory effectively.

## TOPICS COVERED

- Design and development of switched reluctance motor Energy management in Home Artificial Intelligence
- Integration of Large renewable into grid Integration of Renewable Energy Sources and clean coal technology for efficient power system.
- Multilevel Inverter for efficient integration of solar power generation to the grid.

## OUT COMES OF FDP

1. Develop competence in understanding recent advances in the electric vehicle, micro-grid, renewable energy sources, solar PV system, high voltage DC system, advanced power converter control for Solar/ Electric drives.
2. Design controllers for converters used in electric drives, electrical vehicles, etc.
3. Derive dynamic model of various industrial processes & obtain reduced-order model.
4. Learn and apply conventional and advanced control techniques to various industrial processes.
5. Understand and design Kalman filter for specific applications.
6. Develop interest in writing projects related to Hydro Power Plant to overcome the issues and challenges faced by Engineers.

## ABOUT THE COLLEGE

Trinity College Of Engineering And Technology was established in the year 2008, by Trinity Educational Society for community development in a backward educational area dominated by under privileged sections of the society. The college has completed 16 years of its existence with glory. The college is located in Peddapalli with good connectivity of road and rail. The great strength of the college is visionary management. Availability of strategic planning, documentation, record keeping, E-management and innovative teaching practices; quality and access are the core values in curriculum and teaching and evaluation methodologies in alignment with global trends.

## ABOUT THE DEPARTMENT

The aim of the institute is to cultivate in its students' high moral standards coupled with academic excellence to promote market-oriented skill development and up gradation that would help in serving the needs of the society. From its advent, the Institution has acquired a credible position in the fields of Business Administration topped programs.

## ABOUT THE FDP

A Moodle Learning Management System (LMS) is a software application or Web-based technology used to plan, implement, and assess a specific learning process. Typically, a learning management system provides an instructor with a way to create and deliver content, monitor student participation, and assess student performance. LMS is an online system or software which is used to plan, execute, and assess a specific learning process. In simple words, LMS is software used in e-Learning programs and which helps in administration, documentation, tracking, and recording. Learning Management Systems are used to maintain online collaboration over the internet. Colleges and companies use them to deliver online training as well as for maintaining employee records.

## THE OBJECTIVE OF FDP

The main objective of Learning Management Systems is to enhance the learning process. A Learning Management System not only delivers content, but also handles registering courses, course administration, skill gap analysis, tracking, and reporting.

## FDP OUTCOMES

Through this course participants will be able to develop a capacity to design and conduct MOOC courses through MOODLE platform.
