ABOUT THE COLLEGE

Trinity College Of Engineering And Technology was established in the year 2008, by Trinity Educational Society for community development in a backward educational area dominated by under privileged sections of the society. The college is located in Peddapalli with good connectivity of road and rail. The great strength of the college is visionary management. Availability of strategic planning, documentation, record keeping, E-management and innovative teaching practices; quality and access are the core values in curriculum and teaching and evaluation methodologies in alignment with global trends.

ABOUT THE DEPARTMENT

The department of CSE established in 2008 with the approval of AICTE, is set in an open, student friendly atmosphere. The Department of Computer Science and Engineering (CSE) offers B. Tech course in CSE. The Department has experienced faculty with good publications and well-established laboratories. The computer science and engineering department of the college works with a motto of "Excellence in Computing Technology" stresses on strong understanding of theoretical concepts along with the practical experience with several challenging assignments and Projects.

ABOUT THE FDP

The FDP on Cyber security and Data Forensic will be providing the basis knowledge of Cyber security and Data Forensic. Cyber security is the protection of internet-connected systems such as hardware, software and data from cyber threats. Electronic evidence is a component of almost all criminal activities and digital forensics support is crucial for law enforcement investigations. The combination of Cyber security and Data Forensic is Computer forensics. Computer forensic is the application of investigation and analysis techniques to gather and preserve evidence from a particular computing device in a way that is suitable for presentation in a court of law.

THE OBJECTIVE OF FDP

The main objectives of this FDP is to impart technical knowledge on the following concepts on Network Security Measures, Vulnerability Assessment and Penetration Testing, Multi server Authentication, Design of Secure Protocol, Lightweight Cryptosystem and Ethical Hacking.

TOPICS COVERED:

- Network Security Measures
- Cloud Security Engineering
- Network Security
- Software and Web Application Security Malware Analysis

ABOUT THE COLLEGE

Trinity College Of Engineering And Technology was established in the year 2008, by Trinity Educational Society for community development in a backward educational area dominated by under privileged sections of the society. The college is located in Peddapalli with good connectivity of road and rail. The great strength of the college is visionary management. Availability of strategic planning, documentation, record keeping, E-management and innovative teaching practices; quality and access are the core values in curriculum and teaching and evaluation methodologies in alignment with global trends.

ABOUT THE DEPARTMENT

The department of EEE established in 2008 with the approval of AICTE, is set in an open, student friendly atmosphere. We have a fine blend of dynamic and experienced faculty who provide quality education in technical UG programs with JNTU-H curriculum, the department places equal emphasis on theoretical and practical domains of electrical and electronics engineering. The laboratories are highly modernized to reflect the rapidly changing trends in technology. We have been organizing many symposiums, workshops, skill development programs to encourage the students to refine their personality and extracurricular skills.

A ONE WEEK FACULTY
DEVELOPMENT PROGRAMME

ON

DATA SCIENCE AND MACHINE
LEARNING APPLICATION TO
MODERN POWER SYSTEM

DATE: 24/09/2018 to 29/09/2018

M. Ganesh
PRINCIPAL
Trinity College of Engineering and Technology
Peddapalli-505 172-T.S.

ABOUT THE FDP

Data science and machine learning are play a vital role in the modern industrial systems with the development of ICT, an information layer is now added to the conventional electricity transmission and distribution network for the data collection, storage and analysis. To make the system smarter, the emerging multi scale data from the synchrophasors, smart meters, weather and electricity markets offers tremendous opportunities as well as challenges for the industry to dynamically learn and adaptively control a modern power systems.

The program will include expert lectures on data science and machine learning for power engineering application.

THE OBJECTIVE OF FDP

The aim of this program is to provide opportunities to faculty members to learn, understand, and practice big data analytics and machine learning approaches, which include the study of modern computing big data techniques focusing on industry applications.

FDP OUTCOMES

Ability to select and implement machine learning techniques and computing environment that are suitable for the applications under consideration. Ability to understand and apply scaling up machine learning techniques and associated computing techniques and technologies. Ability to integrate machine learning libraries and mathematical and statistical tools with modern technologies.

ABOUT THE COLLEGE

Trinity College Of Engineering And Technology was established in the year 2008, by Trinity Educational Society for community development in a backward educational area dominated by under privileged sections of the society. The college is located in Peddapalli with good connectivity of road and rail. The great strength of the college is visionary management. Availability of strategic planning, documentation, record keeping, E-management and innovative teaching practices; quality and access are the core values in curriculum and teaching and evaluation methodologies in alignment with global trends.

ABOUT THE DEPARTMENT

The department of CSE established in 2008 with the approval of AICTE, is set in an open, student friendly atmosphere. The Department of Computer Science and Engineering (CSE) offers B. Tech course in CSE. The Department has experienced faculty with good publications and well-established laboratories. The computer science and engineering department of the college works with a motto of "Excellence in Computing Technology" stresses on strong understanding of theoretical concepts along with the practical experience with several challenging assignments and Projects.

ABOUT THE FDP

This FDP aims to up-skill and train professionals in Artificial Intelligence and Machine Learning. AI/ML has taken the world by storm as a major field of research and development. Python has surfaced as a dominant language in AI/ML programming because of its simplicity, flexibility and support for open source libraries.

THE OBJECTIVE OF FDP

Learn the concept, syntax, semantics and gain introductory knowledge in Machine Learning principles through examples that provide useful exposure to the various concepts of Machine Learning.

TOPICS COVERED

- Machine Learning-Introduction
- Introduction of Machine Learning
- Evolution of Machine Learning
- Application of Machine Learning
- Machine Learning-Fundamental
- Python-Basics
- Introduction of Python
- Features of Python
- Working with Python
- Basic Syntax of Python
- Core Concepts of Python

OUT COMES OF FDP:

This FDP is to make the participants aware of the AI field. The FDP will comprise of the essential theory with hands-on experiments on different simulation software by the experts from academic institutions to improve the understanding of this highly technical field. This will, in turn, improve the quality of the teaching which will motivate the students to take up the challenges in this interdisciplinary field.

FDP OBJECTIVES:

GeM aims to improve the speed, efficiency, and transparency of public procurement. It provides e-bidding, reverses e-auction, and demand aggregation solutions to enable government users to get the most bang for their buck.

Outcomes

In an online marketplace, consumer transactions are processed by the marketplace operator and then delivered and fulfilled by the participating retailers or wholesalers. These type of websites allow users to register and sell single items to many items for a "post-selling" fee
